

CAMRADATA

# INCORPORATING CHANGE, DRIVING POTENTIAL

Investor Conference - 30 November 2017

## Aims

Market volatility, the low yield environment and meeting total return objectives have been cited at the top 3 challenges for institutional investors during 2017, with market volatility being the most prominent issue. This uncertainty means that investors need to consider how these changes in financial markets will impact their investment decisions and strategies going forwards.

CAMRADATA's Investor Conference will highlight how institutional investors can adapt to ongoing changes in the financial markets and investigate opportunities that offer potential for maintaining and generating return for the future.
